

Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Oppenheim Dynamic Europe Balance

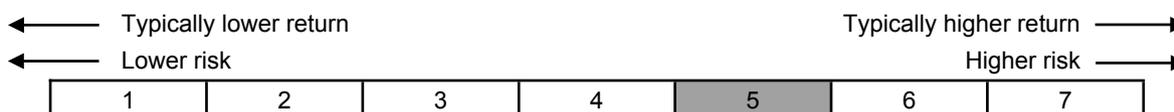

Security code: A0EAWB ISIN: DE000A0EAWB2

Management Company: Deutsche Asset Management Investment GmbH, a member of the Deutsche Bank Group.

Objectives and investment policy

The objective of the investment policy is to achieve the highest possible appreciation of capital. In order to achieve this, at least 51% of the fund's assets are invested in equities, interest-bearing securities of European issuers and derivatives on securities of these issuers. The allocation of equities and bonds is actively managed on a quantitative basis. At the beginning of a calendar year, the fund is always invested 50/50 in an equity and bond portfolio. The future weighting of both portfolios is determined by a quantitative signal, which triggers a gradual reallocation in favor of the better-performing asset class. This asset class may be weighted up to 100% by the end of the year. Derivatives are employed to manage the allocation. In this context, the selection of individual investments is the responsibility of the fund management. The currency of the fund is EUR. The fund distributes annually. You may request the redemption of shares on each valuation day. The redemption may only be suspended in exceptional cases taking into account your interests as an investor.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 5 because its share price fluctuates comparatively strongly and the likelihood of both losses and gains is therefore relatively high. The following risks could be of particular significance for the fund. These risks can impair the performance of the fund and thus impact negatively on the net asset value per unit and on the capital invested by the investor. The unit value may at any time fall below the purchase price paid by the client.

The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases. The fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The deterioration of credit quality (ability and willingness to repay) may have an adverse effect on the value of the bond. A more detailed description of risks and other general information can be found under "Risk warnings" in the sales prospectus.

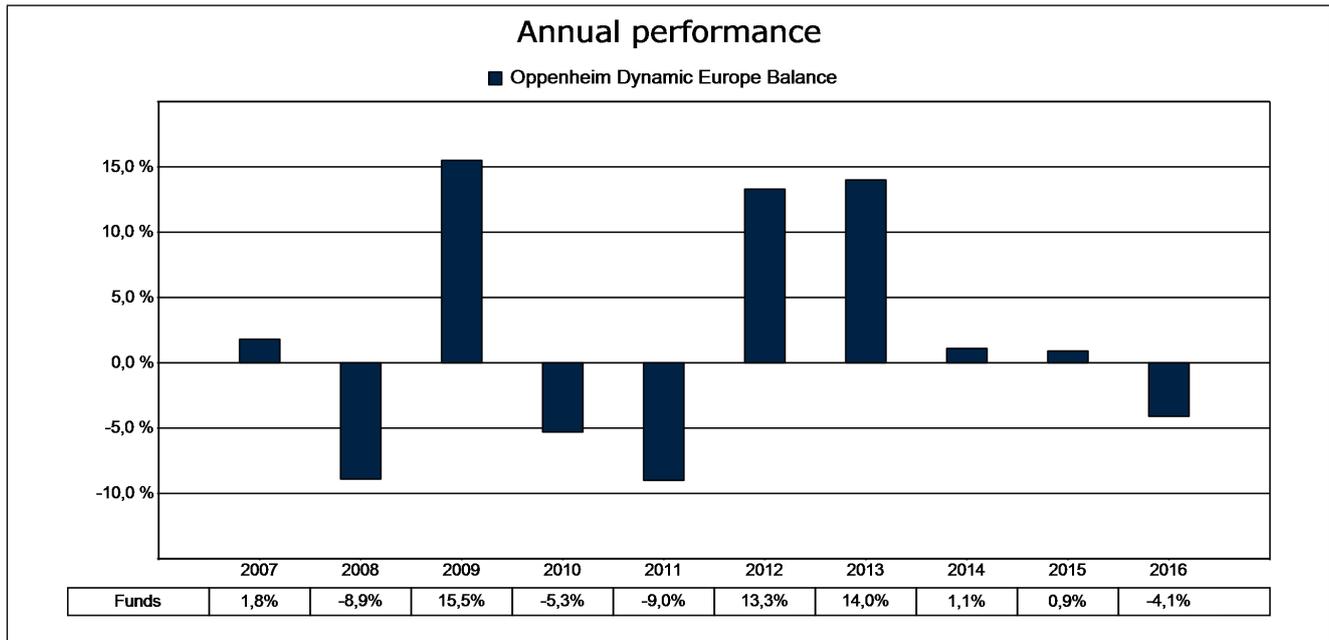

Charges

The costs and fees borne by you are used for the management, administration and custody of the fund, as well as for its distribution and marketing. These costs restrict the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	4,00 %. This is the maximum amount that will be deducted from your investment prior to investment.
Exit charge	No redemption fee
Charges taken from the fund over a year	
Ongoing charge	1,65 %
Charges taken from the fund under certain specific conditions	
Performance fee	None

The front-end load specified here is a maximum amount. It may be lower in individual cases. To find out the amount that is currently applicable for you, please request it from the office responsible for you or from your financial advisor. The current costs specified here were incurred in the fiscal year of the fund, which ended on 31.05.2017. They may change from year to year. The current costs do not include the performance-based fee and the transaction costs. Additional information on costs can be found under "Costs" in the sales prospectus.

Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from Oppenheim Dynamic Europe Balance were deducted during the calculation. Initial sales charges and redemption fees were not taken into account. Oppenheim Dynamic Europe Balance was launched in 2005. The performance was calculated in EUR.
